- version 1.0.1 [9-18-2024]
  - Initial release.
- version 1.0.2 [9-25-2024]
  - Fixed small memory leak in OpenParEM3D
  - Updated installation documentation for Ubuntu 22.04.5 LTS
  - Started change log
- version 1.0.3 [10-5-2024]
  - Fixed a memory cleanup error
  - Ubuntu 24 now supported
  - Updated installation documentation for Ubuntu 24.04.1 LTS
- version 2.0.0 [3-6-25]
  - Added antenna performance metrics.
  - Upgraded adaptive mesh refinement with a new pre-conditioner.
- version 2.1.0 [5-1-2025]
  - Re-organized the code base into a single root directory.
  - Added a script to enable compiling from a single command and verified on multiple Linux platforms.
  - Added a binary build requiring no package installations and verified on multiple Linux platforms.
  - Upgraded libraries
    - Hypre from 2.30.0 to 2.32.0
    - PETSc from 3.19.6 to 3.23.0
    - Metis from 4.0.3 to v5.1.0-p12
    - MFEM from 4.7 to 4.8
- version 2.1.0 [3-20-2025]
  - Updated system calls for improved timing calculations, especially when using Windows WSL2
  - Documentation update to include support for Windows WSL2
- version 2.2.0 [10-17-2026]
  - Initial release of OpenParEMg with users manual.
  - Numerous small changes to OpenParEM3D and OpenParEM2D to support OpenParEMg
  - Update OpenParEM_build to support OpenParEMg
  - Updated the regression suite to run with either OpenParEMg or by script on the FreeCAD/gmsh builds
  - Modified OpenParEM_build to download and verify packages rather than include the packages. Switched to latest release in most cases.
- version 2.2.1 [11-3-2026]
  - Fixed a memory access bug in OpenParEM3D. No known accuracy impact.
  - Maintenance on the regression suite for OpenParEMg.
  - Renamed the build directory for OpenParEMg from build2 to build.
